McGill Physics
Hackathon

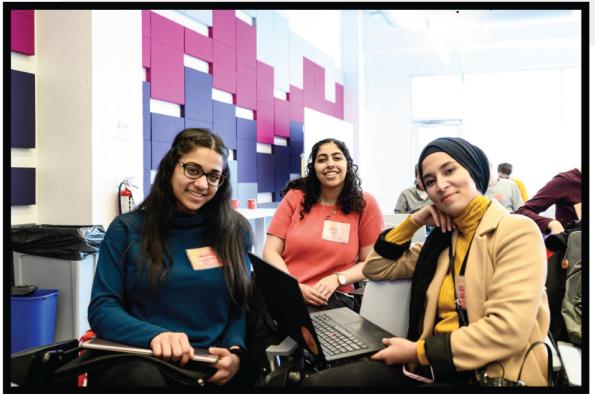

Scientific Revolutions | Advanced Computing
Department of Physics, McGill University
November 5-6, 2022

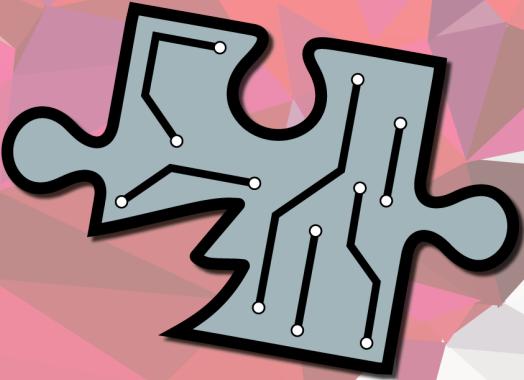

What is the McGill Physics Hackathon?

In recent years, scientific computing has been a driving force in academia and industry. Stunning scientific breakthroughs like the first image of a black hole would be impossible without novel techniques for handling unprecedented volumes and kinds of data. Similar breakthroughs are occurring everywhere we look, and in the coming decade, the trajectories of industry, the sciences, and a new digital economy will be intimately linked.

In our ongoing effort to inspire today's young people to be a part of these revolutions, the McGill University Department of Physics is happy to announce the **7th annual Physics Hackathon!** Based on feedback from last year's completely virtual event -the biggest most international Hackathon so far - this year's edition will be hybrid, so that anyone from anywhere can participate! Hacking will take place online with an in-person opening ceremony at McGill, with details to follow later! On **November 5-6 2022**, we invite all students with an interest in coding and the physical sciences, including high school, CEGEP, undergraduate, and graduate, to participate in this exciting event. Hackers will have the opportunity to hone their skills in coding, scientific reasoning, creativity, and communication, by putting together a project which uses some combination of physics and computing. Throughout the 24-hour event, hackers will be supported by experts from both industry and academia.

Why should you sponsor us?

Sponsoring the Physics Hackathon is an effective way to reach the individuals who will be leading tomorrow's technological revolutions. Your support as a sponsor will enable us to provide a solid platform for hacker-to-hacker and sponsor-to-hacker interactions, introduce attendees to the wide range of opportunities in the tech industry, provide high-quality mentorship, offer exciting prizes, and more!

RECRUITMENT

Our hackathon brings together a large group of passionate, motivated, and savvy students with interests in computing and data science. This year with a hybrid event, sponsors will have access to the wider pool of virtual hackers, and the opportunity to speak and meet with students local to the Montreal area during the opening ceremony.

PRODUCT EXPOSURE

At the hackathon, you will meet a unique group of hackers who are passionate about trying new things. This group includes many of the individuals who are most likely to use and promote your products.

BRAND RECOGNITION

By participating as a sponsor, you will be exposing your company and brand and elevating your presence in the eyes of the tech talents and leaders of the very near future.

LAST YEAR'S SPONSORS

Sponsorship levels

LEVEL	BRONZE	SILVER	GOLD	PLATINUM
COST	\$500	\$1000	\$2000	\$5000
